Milan Nakum

Surat, Gujarat | 6355612681 | milanynakum@gmail.com
github.com/milannakum54 (Personal) | github.com/milannakum24cse-eng (University)

Education

Indus University — Ahmedabad, Gujarat
Bachelor of Technology in Computer Science | ***CGPA: 9.51*** — *Aug. 2024 – May 2028*

- **Relevant Coursework:** Data Structures & Algorithms, Operating Systems, Computer Organization & Architecture, Internet of Things (IoT), Database Management Systems

Experience

Software Engineering Intern (Internal) — May 2025 – July 2025
Indus University — *Ahmedabad, Gujarat*

- Designed and developed a full-featured Electric Vehicle (EV) Online Booking and Registration Website
- Implemented user registration workflows, booking forms, and a responsive layout to ensure smooth navigation, successfully completing the 60-hour curriculum requirement

Projects

Order Queue Management System (DSA) | *React, JavaScript, Data Structures* — Oct. 2025 – Dec. 2025

- Built a responsive frontend interface integrated with custom queue data structure logic to track and manage real-time orders sequentially
- Implemented dynamic state management for enqueue/dequeue operations, mapping custom UI labels such as 'assigning now' and 'driver is on the way', and deployed to Vercel

IoT Speed Detector & Parking System | *Arduino, C++, Hardware Sensors* — Aug. 2025 – Sep. 2025

- Engineered an integrated hardware-software solution for real-time vehicle speed detection and parking spot allocation
- Programmed sensor inputs using the Arduino IDE and structured the comprehensive system block diagram for optimal physical deployment

Optimal Path Routing Engine | *C++, Data Structures* — June 2025 – July 2025

- Developed a pathfinding algorithm engine to calculate the shortest and most efficient routes between interconnected nodes
- Implemented Dijkstra's algorithm and advanced graph data structures to optimize search logic and reduce processing time

Achievements & Extracurriculars

Odoo x Indus University Hackathon | *Participant* — Feb. 2026

- Competed in a rigorous, time-constrained rapid-development environment during the second academic year
- Applied core programming fundamentals and collaborated effectively to prototype and pitch software solutions

Technical Skills

Languages: C/C++, JavaScript, HTML/CSS
Frameworks: React, Express.js
Databases: MongoDB (Basic)
Developer Tools: Git, GitHub, Vercel, Arduino IDE, Generative AI Prompting
